**Area Director   -
"eHealth and Biomedical Applications"**

Vicomtech (www.vicomtech.org) is an applied research center specialized in Computer Graphics and Multimedia technologies located in San Sebastian (Spain). With five areas and more than 90 researchers, including 19 Ph.D. Vicomtech promotes the use of the latest technologies coming out from research in prototypes and products that support the innovation cycle in companies and institutions of different sectors.

We are looking now for a **Director for the Area "eHealth   and Biomedical Applications"** (http://www.vicomtech.es/ingles/html/areas/index_area2.html). The Area´s objective is to carry out research and development in computer-assisted technologies for the healthcare and biotechnology industry. The main research activities include image analysis, advanced interface and biomedical information management. The candidate should have the following profile:

Education: Ph.D. in Bioinformatics, eHealth, Medical Imaging, Bioengineering, Computer Graphics ore related fields.

Alternatively, Doctor in Medicine with strong inclination to IT applied research or Medical applications.

Experience: Experience in applied research projects with companies and/or experience in high-level basic research projects, for at least 3 years. EU Projects experience is a clear plus.

Strategic Vision: Competence to set up the strategic vision for the area as well as to promote the fulfillment the overall area objectives (scientific, economic, etc.). Experience in managing other similar departments is highly desirable.

Scientific Profile: Sound scientific profile with the required skills to identify new scientific and technological lines, develop and monitor the technology roadmap, to coordinate projects globally at scientific and technical level, and to support strongly the scientific dissemination (publications) and training and education needs of the staff (including Ph.D. candidates).

Project Acquisition: Ability and experience in acquiring research projects, at basic funding, industrial and/or European level. The candidate should have experience in direct contact to industrial clients, in order to identify their needs and propose added value applied research solutions .

Staff management: Ability (and desirable experience) in managing a staff of highly motivated researchers (approx. 16 researchers plus few students)

Project Management: Experience in all aspects of research project management.

Languages: High level of English. Spanish is not a requirement. However, Spanish knowledge is a plus and will be taken into account.

The working conditions are very good and highly competitive at international standards.

Candidates   are   invited   to   submit   their   CV´s   (*Ref.   Department   Head   Bio*)   to e-mail: jposada@vicomtech.org
